ELSEVIER

Journal of Inorganic Biochemistry 81 (2000) 329–333

JOURNAL OF Inorganic Biochemistry

www.elsevier.nl/locate/jinorgbio

Subject Index of Volume 81

Acetylated carbohydrates
synthesis and characterization of novel platinum(IV) complexes with non-functionalized acetylated carbohydrates, 43
Active oxygen
redox and fungicidal properties of phthalocyanine metal complexes as related to active oxygen, 285
Adenosine 5′-triphosphate
mathematical modelling of kinetics of adenosine 5′-triphosphate hydrolysis catalyzed by Zn^{2+} ion in the pH range 7.1–7.4, 239
S-Adenosylmethionine
transsulfuration in *Saccharomyces cerevisiae* is not dependent on heme: purification and characterization of recombinant yeast cystathionine β-synthase, 161
Adhesion
Cu(II) and Zn(II) complexes with hyaluronic acid and its sulphated derivative. Effect on the motility of vascular endothelial cells, 229
β-alanine
preparation, X-ray crystal structure, and ^{195}Pt NMR spectra of platinum(II) with dipeptides and dipeptide methyl esters, 49
Aldehydes
stopped-flow spectrophotometric analysis of intermediates in the peroxo-dependent inactivation of cytochrome P450 by aldehydes, 153
Alternative ligand binding modes
multicopy molecular dynamics simulations suggest how to reconcile crystallographic and product formation data for camphor enantiomers bound to cytochrome P-450cam, 121
Aluminum
aluminum speciation studies in biological fluids. Part 6. Quantitive investigation of aluminium(III)–tartrate complex equilibria and their potential implications for aluminum metabolism and toxicity, 301
Anion binding
ionic strength and pH effect on the Fe(III)-imidazolate bond in the heme pocket of horseradish peroxidase: an EPR and UV–visible combined approach, 259
Anti-cancer
effects of monofunctional platinum binding on the thermal stability and conformation of a self-complementary 22-mer, 313
Anti-inflammatory
low-temperature crystal structures of Tetrakis-μ-3,5-diisopropylsalicylatobis-dimethylformamidodicopper(II) and Tetrakis-μ-3,5-diisopropylsalicylatobis-diethyletheratodicopper(II) and their role in modulating polymorphonuclear leukocyte activity in overcoming seizures, 11
synthesis and characterization of a diruthenium–ibuprofenato complex. Comparing its anti-inflammatory activity with that of a copper(II)–ibuprofenato complex, 23
Antibacterial studies
interactions of metal ions with a 2,4-diaminopyrimidine derivative (trimethoprim). Antibacterial studies, 275
Anticonvulsant
low-temperature crystal structures of Tetrakis-μ-3,5-diisopropylsalicylatobis-dimethylformamidodicopper(II) and Tetrakis-μ-3,5-diisopropylsalicylatobis-diethyletheratodicopper(II) and their role in modulating polymorphonuclear leukocyte activity in overcoming seizures, 11
Atomic absorption spectrometry
investigation of the transported heavy metal ions in xylem sap of cucumber plants by size exclusion chromatography and atomic absorption spectrometry, 81
Autoxidation
oxymyohemerythrin: discriminating between O_2 release and autoxidation, 293
Azide
the ferric form of the three human embryonic hemoglobins and their reactions with azide ions, 99

Binding
the ferric form of the three human embryonic hemoglobins and their reactions with azide ions, 99
Biological activity
synthesis, structural characterization and biological activity of *p*-fluorobenzaldehyde thiosemicarbazones and of a nickel complex, 89
Biological fluids
aluminum speciation studies in biological fluids. Part 6. Quantitive investigation of aluminium(III)–tartrate complex equilibria and their potential implications for aluminum metabolism and toxicity, 301
Bis(imidazol-2-yl)methane
the effect of histidyl residues on the complexation of bis(imidazolyl) containing tripeptides with copper(II) ion, 35

Camphor
multicopy molecular dynamics simulations suggest how to reconcile crystallographic and product formation data for camphor enantiomers bound to cytochrome P-450cam, 121
Carbohydrate ligands
synthesis and characterization of novel platinum(IV) complexes with non-functionalized acetylated carbohydrates, 43
Carbonated hydroxyapatites
carbonated hydroxyapatites precipitated in the presence of Ti, 57
Catalysis
the formation of a 1–5 phosphodiester linkage in the spontaneous breakdown of 5-phosphoribosyl-α-1-pyrophosphate, 73
Chemical speciation
analysis and chemical speciation of copper and zinc in wound fluid, 1
Chemotaxis
Cu(II) and Zn(II) complexes with hyaluronic acid and its sulphated derivative. Effect on the motility of vascular endothelial cells, 229

Elsevier Science S.A.
PII: S0162-0134(00)00167-7

Chiral resolution
enantiomeric discrimination of Ru-substrates by cytochrome $P450_{cam}$, 221
Circular dichroism
effects of monofunctional platinum binding on the thermal stability and conformation of a self-complementary 22-mer, 313
Complex
preparation, X-ray crystal structure, and ^{195}Pt NMR spectra of platinum(II) with dipeptides and dipeptide methyl esters, 49
Complexes
Mn^{2+}, Co^{2+}, Cu^{2+} and Zn^{2+}complexes with two macrocyclic ligands bearing L-lactate-like functions: potentiometric studies and evaluation of superoxide-scavenging properties of the Mn^{2+} complex, 65
Compound II
autocatalytic nitration of $P450_{CAM}$ by peroxynitrite, 213
Copper
analysis and chemical speciation of copper and zinc in wound fluid, 1
stability constants of potent cytotoxic copper(II) complexes with furan semicarbazones in ethanolic solutions, 29
Copper(II)
synthesis and characterization of a diruthenium–ibuprofenato complex. Comparing its anti-inflammatory activity with that of a copper(II)–ibuprofenato complex, 23
Copper(II) complexes
the effect of histidyl residues on the complexation of bis(imidazolyl) containing tripeptides with copper(II) ion, 35
Cryo-crystallography
crystal structures of cytochrome P450nor and its mutants (Ser286→Val, Thr) in the ferric resting state at cryogenic temperature: a comparative analysis with monooxygenase cytochrome P450s, 191
Crystal structure(s)
microsomal cytochrome P450 2C5: comparison to microbial P450s and unique features, 183
synthesis, structural characterization and biological activity of *p*-fluorobenzaldehyde thiosemicarbazones and of a nickel complex, 89
Crystallography
low-temperature crystal structures of Tetrakis-μ-3,5-diisopropylsalicylatobis-dimethylformamidodicopper(II) and Tetrakis-μ-3,5-diisopropylsalicylatobis-diethyletheratodicopper(II) and their role in modulating polymorphonuclear leukocyte activity in overcoming seizures, 11
Cu(II) and Zn(II) complexes
Cu(II) and Zn(II) complexes with hyaluronic acid and its sulphated derivative. Effect on the motility of vascular endothelial cells, 229
Cucumber
investigation of the transported heavy metal ions in xylem sap of cucumber plants by size exclusion chromatography and atomic absorption spectrometry, 81
Cystathionine β-synthase
transsulfuration in *Saccharomyces cerevisiae* is not dependent on heme: purification and characterization of recombinant yeast cystathionine β-synthase, 161
Cytochrome P450
crystal structures of cytochrome P450nor and its mutants (Ser286→Val, Thr) in the ferric resting state at cryogenic temperature: a comparative analysis with monooxygenase cytochrome P450s, 191
enantiomeric discrimination of Ru-substrates by cytochrome $P450_{cam}$, 221
microsomal cytochrome P450 2C5: comparison to microbial P450s and unique features, 183
multicopy molecular dynamics simulations suggest how to reconcile crystallographic and product formation data for camphor enantiomers bound to cytochrome P-450cam, 121
roles of the axial push effect in cytochrome P450cam studied with the site-directed mutagenesis at the heme proximal site, 141
stopped-flow spectrophotometric analysis of intermediates in the peroxo-dependent inactivation of cytochrome P450 by aldehydes, 153
Cytotoxic complexes
stability constants of potent cytotoxic copper(II) complexes with furan semicarbazones in ethanolic solutions, 29
Cytotoxicity
DNA targeted platinum complexes: synthesis, cytotoxicity and DNA interactions of *cis*-dichloroplatinum(II) complexes tethered to phenazine-1-carboxamides, 111

DNA
DNA targeted platinum complexes: synthesis, cytotoxicity and DNA interactions of *cis*-dichloroplatinum(II) complexes tethered to phenazine-1-carboxamides, 111
effects of monofunctional platinum binding on the thermal stability and conformation of a self-complementary 22-mer, 313
Denitrifying fungus
crystal structures of cytochrome P450nor and its mutants (Ser286→Val, Thr) in the ferric resting state at cryogenic temperature: a comparative analysis with monooxygenase cytochrome P450s, 191
2,4-diaminopyrimidine derivative
interactions of metal ions with a 2,4-diaminopyrimidine derivative (trimethoprim). Antibacterial studies, 275
cis-Dichloroplatinum (II)
DNA targeted platinum complexes: synthesis, cytotoxicity and DNA interactions of *cis*-dichloroplatinum(II) complexes tethered to phenazine-1-carboxamides, 111
Diruthenium(II,III)
synthesis and characterization of a diruthenium–ibuprofenato complex. Comparing its anti-inflammatory activity with that of a copper(II)–ibuprofenato complex, 23

Electron paramagnetic resonance
the role of tetrahydrobiopterin in the activation of oxygen by nitric-oxide synthase, 207
Electron paramagnetic resonance spectroscopy
ionic strength and pH effect on the Fe(III)-imidazolate bond in the heme pocket of horseradish peroxidase: an EPR and UV–visible combined approach, 259
Embryonic
the ferric form of the three human embryonic hemoglobins and their reactions with azide ions, 99
Endothelial cells
Cu(II) and Zn(II) complexes with hyaluronic acid and its sulphated derivative. Effect on the motility of vascular endothelial cells, 229
Erythrocyte membrane
$HgCl_2$ disrupts the structure of the human erythrocyte membrane and model phospholipid bilayers, 267
ESI mass spectrometry
synthesis and characterization of novel platinum(IV) complexes with non-functionalized acetylated carbohydrates, 43
Ethanolic solutions
stability constants of potent cytotoxic copper(II) complexes with furan semicarbazones in ethanolic solutions, 29

Fungicidal properties
redox and fungicidal properties of phthalocyanine metal complexes as related to active oxygen, 285
Furan
stability constants of potent cytotoxic copper(II) complexes with furan semicarbazones in ethanolic solutions, 29

Gas chromatographic–mass spectrometry
selenium determination in human plasma lipoprotein fractions by mass spectrometry analysis, 105
Gastrotoxicity
synthesis and characterization of a diruthenium–ibuprofenato complex. Comparing its anti-inflammatory activity with that of a copper(II)–ibuprofenato complex, 23

Heavy metals
investigation of the transported heavy metal ions in xylem sap of cucumber plants by size exclusion chromatography and atomic absorption spectrometry, 81
Heme
stopped-flow spectrophotometric analysis of intermediates in the peroxo-dependent inactivation of cytochrome P450 by aldehydes, 153
transsulfuration in *Saccharomyces cerevisiae* is not dependent on heme: purification and characterization of recombinant yeast cystathionine β-synthase, 161
Heme iron coordination structure
proximal ligand control of heme iron coordination structure and reactivity with hydrogen peroxide: investigations of the myoglobin cavity mutant H93G with unnatural oxygen donor proximal ligands, 173
Heme-thiolate enzyme
mapping the active site polarity in structures of endothelial nitric oxide synthase heme domain complexed with isothioureas, 133
Hemoglobin
the ferric form of the three human embryonic hemoglobins and their reactions with azide ions, 99
High temperature molecular dynamics
multicopy molecular dynamics simulations suggest how to reconcile crystallographic and product formation data for camphor enantiomers bound to cytochrome P-450cam, 121
Homocysteine
transsulfuration in *Saccharomyces cerevisiae* is not dependent on heme: purification and characterization of recombinant yeast cystathionine β-synthase, 161
Horseradish peroxidase
ionic strength and pH effect on the Fe(III)-imidazolate bond in the heme pocket of horseradish peroxidase: an EPR and UV–visible combined approach, 259
Human
selenium determination in human plasma lipoprotein fractions by mass spectrometry analysis, 105
Hydrogen peroxide
proximal ligand control of heme iron coordination structure and reactivity with hydrogen peroxide: investigations of the myoglobin cavity mutant H93G with unnatural oxygen donor proximal ligands, 173
Hydrolysis
mathematical modelling of kinetics of adenosine 5′-triphosphate hydrolysis catalyzed by Zn^{2+} ion in the pH range 7.1–7.4, 239

Ibuprofen
synthesis and characterization of a diruthenium–ibuprofenato complex. Comparing its anti-inflammatory activity with that of a copper(II)–ibuprofenato complex, 23
Imidazole nitrogen
the effect of histidyl residues on the complexation of bis(imidazolyl) containing tripeptides with copper(II) ion, 35
Inhibitor design
mapping the active site polarity in structures of endothelial nitric oxide synthase heme domain complexed with isothioureas, 133
Ionic strength
ionic strength and pH effect on the Fe(III)-imidazolate bond in the heme pocket of horseradish peroxidase: an EPR and UV–visible combined approach, 259

Iron-hydroperoxo intermediate
roles of the axial push effect in cytochrome P450cam studied with the site-directed mutagenesis at the heme proximal site, 141
Isoporphyrin
stopped-flow spectrophotometric analysis of intermediates in the peroxo-dependent inactivation of cytochrome P450 by aldehydes, 153
Isothiourea
mapping the active site polarity in structures of endothelial nitric oxide synthase heme domain complexed with isothioureas, 133

Kinetics
mathematical modelling of kinetics of adenosine 5′-triphosphate hydrolysis catalyzed by Zn^{2+} ion in the pH range 7.1–7.4, 239
oxymyohemerythrin: discriminating between O_2 release and autoxidation, 293
stopped-flow spectrophotometric analysis of intermediates in the peroxo-dependent inactivation of cytochrome P450 by aldehydes, 153

Lipoproteins
selenium determination in human plasma lipoprotein fractions by mass spectrometry analysis, 105
Locally enhanced sampling (LES)
multicopy molecular dynamics simulations suggest how to reconcile crystallographic and product formation data for camphor enantiomers bound to cytochrome P-450cam, 121
Low-temperature spectroscopy
the role of tetrahydrobiopterin in the activation of oxygen by nitric-oxide synthase, 207

Macrocycles
Mn^{2+}, Co^{2+}, Cu^{2+} and Zn^{2+} complexes with two macrocyclic ligands bearing L-lactate-like functions: potentiometric studies and evaluation of superoxide-scavenging properties of the Mn^{2+} complex, 65
Manganese
Mn^{2+}, Co^{2+}, Cu^{2+} and Zn^{2+} complexes with two macrocyclic ligands bearing L-lactate-like functions: potentiometric studies and evaluation of superoxide-scavenging properties of the Mn^{2+} complex, 65
Mechanism
mathematical modelling of kinetics of adenosine 5′-triphosphate hydrolysis catalyzed by Zn^{2+} ion in the pH range 7.1–7.4, 239
Melting temperature
effects of monofunctional platinum binding on the thermal stability and conformation of a self-complementary 22-mer, 313
Mercuric ions
$HgCl_2$ disrupts the structure of the human erythrocyte membrane and model phospholipid bilayers, 267
Metal ion complexes
Cu(II) and Zn(II) complexes with hyaluronic acid and its sulphated derivative. Effect on the motility of vascular endothelial cells, 229
Metal ions
interactions of metal ions with a 2,4-diaminopyrimidine derivative (trimethoprim). Antibacterial studies, 275
Metal-catalysis
autocatalytic nitration of $P450_{CAM}$ by peroxynitrite, 213
Mg^{2+}
the formation of a 1–5 phosphodiester linkage in the spontaneous breakdown of 5-phosphoribosyl-α-1-pyrophosphate, 73
Microsomal P450
microsomal cytochrome P450 2C5: comparison to microbial P450s and unique features, 183
Migration
Cu(II) and Zn(II) complexes with hyaluronic acid and its sulphated

derivative. Effect on the motility of vascular endothelial cells, 229
Myoglobin cavity mutant H93G
proximal ligand control of heme iron coordination structure and reactivity with hydrogen peroxide: investigations of the myoglobin cavity mutant H93G with unnatural oxygen donor proximal ligands, 173
Myohemerythrin
oxymyohemerythrin: discriminating between O_2 release and autoxidation, 293

NH–S hydrogen bonds
roles of the axial push effect in cytochrome P450cam studied with the site-directed mutagenesis at the heme proximal site, 141
NMR
preparation, X-ray crystal structure, and ^{195}Pt NMR spectra of platinum(II) with dipeptides and dipeptide methyl esters, 49
synthesis and characterization of novel platinum(IV) complexes with non-functionalized acetylated carbohydrates, 43
NMR spectra
synthesis, structural characterization and biological activity of *p*-fluorobenzaldehyde thiosemicarbazones and of a nickel complex, 89
Nitration
autocatalytic nitration of $P450_{CAM}$ by peroxynitrite, 213
Nitric oxide reductase
crystal structures of cytochrome P450nor and its mutants (Ser286→Val, Thr) in the ferric resting state at cryogenic temperature: a comparative analysis with monooxygenase cytochrome P450s, 191
Nitric oxide synthase
mapping the active site polarity in structures of endothelial nitric oxide synthase heme domain complexed with isothioureas, 133
the role of tetrahydrobiopterin in the activation of oxygen by nitric-oxide synthase, 207
Non-heme iron
oxymyohemerythrin: discriminating between O_2 release and autoxidation, 293

P450 enzymes
autocatalytic nitration of $P450_{CAM}$ by peroxynitrite, 213
Peptide methyl esters
preparation, X-ray crystal structure, and ^{195}Pt NMR spectra of platinum(II) with dipeptides and dipeptide methyl esters, 49
Peptide
preparation, X-ray crystal structure, and ^{195}Pt NMR spectra of platinum(II) with dipeptides and dipeptide methyl esters, 49
Peroxynitrite
autocatalytic nitration of $P450_{CAM}$ by peroxynitrite, 213
pH effect
ionic strength and pH effect on the Fe(III)-imidazolate bond in the heme pocket of horseradish peroxidase: an EPR and UV–visible combined approach, 259
Phenazine-1-carboxamides
DNA targeted platinum complexes: synthesis, cytotoxicity and DNA interactions of *cis*-dichloroplatinum(II) complexes tethered to phenazine-1-carboxamides, 111
Phosphodiester
the formation of a 1–5 phosphodiester linkage in the spontaneous breakdown of 5-phosphoribosyl-α-1-pyrophosphate, 73
Phospholipid bilayer
$HgCl_2$ disrupts the structure of the human erythrocyte membrane and model phospholipid bilayers, 267
5-phosphoribosyl-α-1-pyrophosphate
the formation of a 1–5 phosphodiester linkage in the spontaneous breakdown of 5-phosphoribosyl-α-1-pyrophosphate, 73
Phthalocyanine metal complexes
redox and fungicidal properties of phthalocyanine metal complexes as related to active oxygen, 285
Platinum complexes
effects of monofunctional platinum binding on the thermal stability and conformation of a self-complementary 22-mer, 313
synthesis and characterization of novel platinum(IV) complexes with non-functionalized acetylated carbohydrates, 43
Platinum
preparation, X-ray crystal structure, and ^{195}Pt NMR spectra of platinum(II) with dipeptides and dipeptide methyl esters, 49
Potentiometric stripping analysis
analysis and chemical speciation of copper and zinc in wound fluid, 1
Potentiometry
Mn^{2+}, Co^{2+}, Cu^{2+} and Zn^{2+} complexes with two macrocyclic ligands bearing L-lactate-like functions: potentiometric studies and evaluation of superoxide-scavenging properties of the Mn^{2+} complex, 65
Preparation
preparation, X-ray crystal structure, and ^{195}Pt NMR spectra of platinum(II) with dipeptides and dipeptide methyl esters, 49
Proton delivery
crystal structures of cytochrome P450nor and its mutants (Ser286→Val, Thr) in the ferric resting state at cryogenic temperature: a comparative analysis with monooxygenase cytochrome P450s, 191
Proximal ligands
proximal ligand control of heme iron coordination structure and reactivity with hydrogen peroxide: investigations of the myoglobin cavity mutant H93G with unnatural oxygen donor proximal ligands, 173
Push effect
roles of the axial push effect in cytochrome P450cam studied with the site-directed mutagenesis at the heme proximal site, 141

Redox properties
redox and fungicidal properties of phthalocyanine metal complexes as related to active oxygen, 285
Ribose 1,5-cyclic phosphate
the formation of a 1–5 phosphodiester linkage in the spontaneous breakdown of 5-phosphoribosyl-α-1-pyrophosphate, 73
Rice blast
redox and fungicidal properties of phthalocyanine metal complexes as related to active oxygen, 285
Ruthenium
enantiomeric discrimination of Ru-substrates by cytochrome $P450_{cam}$, 221

Selenium
selenium determination in human plasma lipoprotein fractions by mass spectrometry analysis, 105
Semicarbazones
stability constants of potent cytotoxic copper(II) complexes with furan semicarbazones in ethanolic solutions, 29
Sensitizer-linked substrates
enantiomeric discrimination of Ru-substrates by cytochrome $P450_{cam}$, 221
Size exclusion chromatography
investigation of the transported heavy metal ions in xylem sap of cucumber plants by size exclusion chromatography and atomic absorption spectrometry, 81
Stability constants
stability constants of potent cytotoxic copper(II) complexes with furan semicarbazones in ethanolic solutions, 29
Structural comparison
crystal structures of cytochrome P450nor and its mutants (Ser286→Val, Thr) in the ferric resting state at cryogenic temperature: a comparative analysis with monooxygenase cytochrome P450s, 191
Sulphated hyaluronic acid
Cu(II) and Zn(II) complexes with hyaluronic acid and its sulphated

derivative. Effect on the motility of vascular endothelial cells, 229
Superoxide scavenger
Mn^{2+}, Co^{2+}, Cu^{2+} and Zn^{2+}complexes with two macrocyclic ligands bearing L-lactate-like functions: potentiometric studies and evaluation of superoxide-scavenging properties of the Mn^{2+} complex, 65

Tartaric acid
aluminum speciation studies in biological fluids. Part 6. Quantitive investigation of aluminium(III)–tartrate complex equilibria and their potential implications for aluminum metabolism and toxicity, 301
Ternary copper(II) complexes
low-temperature crystal structures of Tetrakis-μ-3,5-diisopropylsalicylatobis-dimethylformamidodicopper(II) and Tetrakis-μ-3,5-diisopropylsalicylatobis-diethyletheratodicopper(II) and their role in modulating polymorphonuclear leukocyte activity in overcoming seizures, 11
Tetrahydrobiopterin
the role of tetrahydrobiopterin in the activation of oxygen by nitric-oxide synthase, 207
Thiolate
roles of the axial push effect in cytochrome P450cam studied with the site-directed mutagenesis at the heme proximal site, 141
Thiosemicarbazones
synthesis, structural characterization and biological activity of *p*-fluorobenzaldehyde thiosemicarbazones and of a nickel complex, 89
Ti–hydroxyapatites
carbonated hydroxyapatites precipitated in the presence of Ti, 57
Transmission electron microscopy
carbonated hydroxyapatites precipitated in the presence of Ti, 57
Transsulfuration
transsulfuration in *Saccharomyces cerevisiae* is not dependent on heme: purification and characterization of recombinant yeast cystathionine β-synthase, 161
Trihydrobiopterin
the role of tetrahydrobiopterin in the activation of oxygen by nitric-oxide synthase, 207
Tripeptide derivatives
the effect of histidyl residues on the complexation of bis(imidazolyl) containing tripeptides with copper(II) ion, 35

Unnatural oxygen donors
proximal ligand control of heme iron coordination structure and reactivity with hydrogen peroxide: investigations of the myoglobin cavity mutant H93G with unnatural oxygen donor proximal ligands, 173
Unwinding
DNA targeted platinum complexes: synthesis, cytotoxicity and DNA interactions of *cis*-dichloroplatinum(II) complexes tethered to phenazine-1-carboxamides, 111

Wound healing
analysis and chemical speciation of copper and zinc in wound fluid, 1

X-ray crystal structure
preparation, X-ray crystal structure, and ^{195}Pt NMR spectra of platinum(II) with dipeptides and dipeptide methyl esters, 49
Xylem
investigation of the transported heavy metal ions in xylem sap of cucumber plants by size exclusion chromatography and atomic absorption spectrometry, 81

Zinc
analysis and chemical speciation of copper and zinc in wound fluid, 1
Zn^{2+}-complexes
mathematical modelling of kinetics of adenosine 5′-triphosphate hydrolysis catalyzed by Zn^{2+} ion in the pH range 7.1–7.4, 239
